Instructions for Pinnacle templates

Installing and opening Pinnacle templates

Here are the steps to install a template you have purchased from the Discovery Center store.

- 1. Download the zip file to your computer.
- 2. Extract the folder (i.e. P-01) to a location of your choosing on your computer.
- 3. Open Pinnacle Studio and in the Library panel of the Edit tab, select Project Bins.
- 4. Click on the **Quick Import** icon and browse to the location where you extracted the template folder.

- 5. Select all the files in the folder and click **Open**. The files will be loaded into a project bin.
- In the project bin, locate the <u>movie.axp</u> file (i.e. <u>p-01.movie.axp</u>) and double-click on this file. This will open the project on the timeline.

- 7. On the timeline, you will see the project template includes multiple tracks for the various components, including titles, effects, backgrounds, and media placeholders.
- 8. Some templates have been created using the **Split Screen Template Creator** and therefore will have a split screen component on the timeline as well. These templates include:
 - a. Sliding Lines (P-02)
 - b. Vibrant Lines (P-06)
 - c. Blur Effect (P-08)
 - d. Focus (P-09)
 - e. Shattered (P-10)

Adding media to a template

Important! Before you start adding your media (photos and video clips) to the template, make sure you are using the **Replace** editing mode. This will allow you to replace the placeholders with your own media.

Fit v 1/2				Į.	1x	8.10	M	4		►	►I	PiP		Ø
🔟 🖣 🔹	K	k≁)	•[]•	€ ÷	£,				* +	2	C	71	1	
				_			1						/	*

- 1. Add the media (photos and/or video clips) you want to include in your movie to the **Library** by dragging and dropping them into a new **Project Bin** or a new **Collection**.
- 2. Locate the placeholder track(s) on the timeline. The placeholders are numbered elements with a grey striped background. Some templates will have placeholders on more than one track.

3. Drag and drop a photo or video from the library onto the first placeholder. Continue to replace all placeholders with your media.

- 4. For a split screen placeholder, right-click on the placeholder in the timeline and select Edit in Sub Editor.
- 5. The **Sub Editor** will open in a new window. Drag and drop your media from the library onto the placeholders.
- 6. Once you've added your media, click **OK** to exit the **Sub Editor** and return to the timeline.

Adding titles

1. To edit the titles, locate the track that has the title placeholders (Blank Title).

3. In the **Title** panel, you can enter your own text and adjust various text settings and properties.

To learn more about title editing, see our collection of tutorials on <u>Working with Text and Titles in</u> <u>Pinnacle Studio</u>.

Saving and Exporting

To save your movie, use **File** > **Save Movie As**. Choose a file location to save your movie, enter a new name and click **Save**.

To export your movie, switch to the **Export** tab. Choose a file location to export your movie, enter a name and click **Start Export**.
