

## How to install and use motion graphics

[VideoStudio Instructions](#) [Pinnacle Studio Instructions](#)

### For VideoStudio users:

\*These .mov files (GoPro Cineform) are compatible with VideoStudio 2019 and higher.

1. Download the zip file and extract the .mov file to your computer (folder location doesn't matter).
2. Open VideoStudio and go to the **Edit** tab.
3. Drag and drop the .mov file from your computer directly onto the **Overlay** track in the timeline.
4. You can also drag and drop the file directly into the media library:
  - Click the **Overlays** icon on the media library panel to open the **Overlays** section of the library.
  - Optional: select one of the sub-menu items such as **Animated Overlays**.
  - Drag and drop the file into the media library OR click the **Import Media Files** icon, browse to the location on your computer where you've downloaded the file, select the file and click **Open**.
  - Drag and drop the motion graphic from the media library onto the **Overlay** track in the timeline.

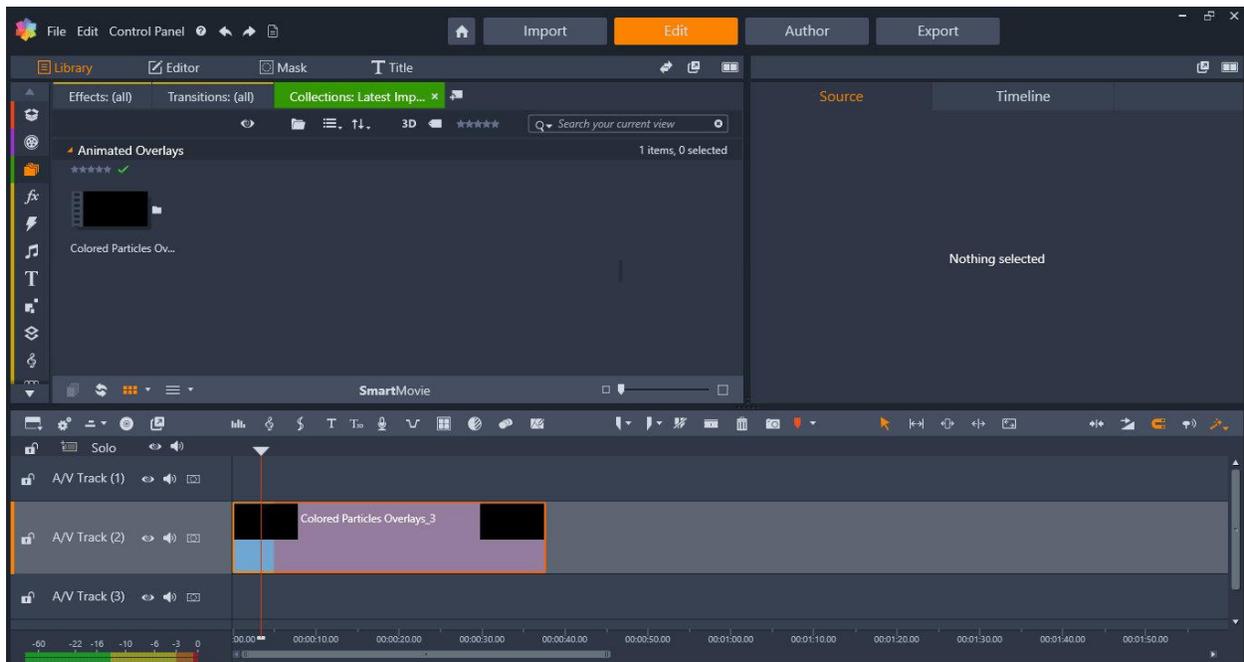

You can use motion graphics in their original format to enhance your video projects but you can also customize the color, speed, size, position, transparency and other characteristics to suit your needs. To learn more, watch our tutorial [How to use motion graphics in VideoStudio](#).

## For Pinnacle Studio users:

\*These .mov files (GoPro Cineform) are compatible with Pinnacle Studio 23 Ultimate and higher.

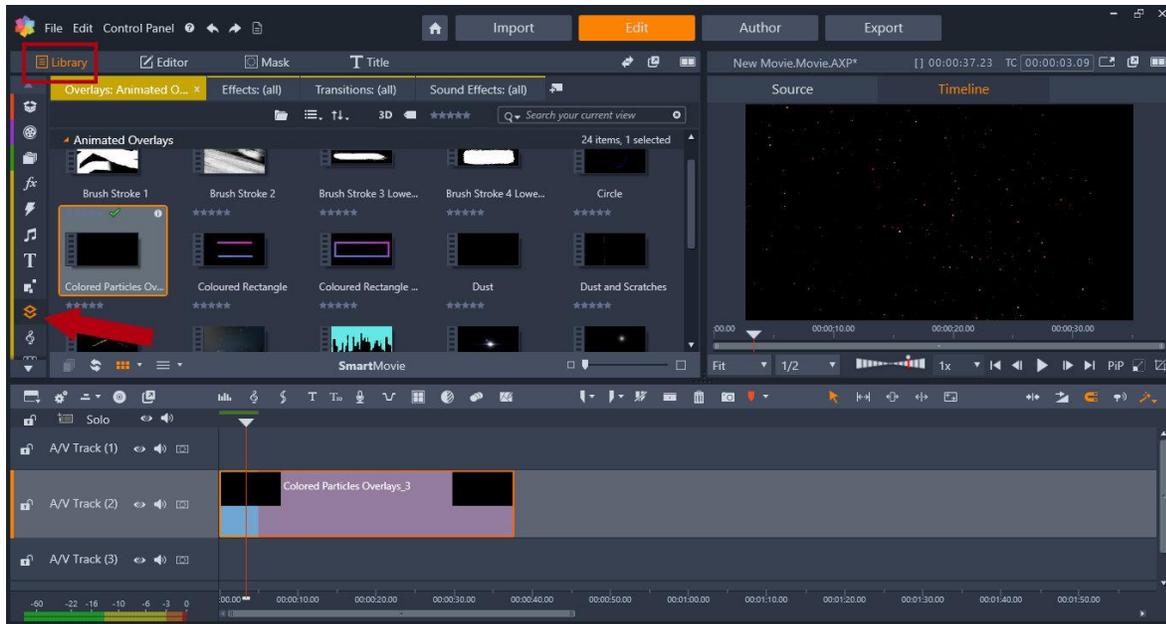

### Option 1

1. Download the zip file and extract the motion graphic (.mov) file to any location on your computer.
2. Open Pinnacle Studio and go to the **Edit** tab.
3. Drag and drop the .mov file from your computer into the media library. This will automatically create a collection called "Latest Imports".
4. Drag the file from the media library onto A/V track 2 on the timeline.

### Option 2

1. Download the zip file and extract the .mov file to the following location:  
C:\Users\Public\Documents\Pinnacle\Content\OverlayAssets\Animated Overlays
2. Open Pinnacle Studio and go to the **Edit** tab.
3. Click the **Overlays** icon in the media library and you should find the .mov file in the **Animated Overlays** section.
4. Drag the file from the media library onto A/V track 2 on the timeline.

You can use motion graphics in their original format to enhance your video projects but you can also customize the color, speed, size, position, transparency and other characteristics to suit your needs. To learn more, watch our tutorial [How to use motion graphics in Pinnacle Studio](#).
